

# Dice Footy - How to play...

Materials: 2 different coloured dice per player, pen/pencil, and tally sheet.

- Pick your two dice and decide what colour will be your goals and what colour will be your behinds or points.
- Each player rolls one of their dice. The player to get the highest number goes first.
- First player rolls both their dice at the same time. For example if their 'White' dice is goals and they roll a **4** they write a four in the 'goals' column. If their 'black' dice is their points and they roll a **6** they write 6 in the point column.

	Goals	Points/behinds	Total
1 <sup>st</sup> Quarter	4	6	30
2 <sup>nd</sup> Quarter			
3 <sup>rd</sup> Quarter			
4 <sup>th</sup> Quarter			
FINAL TOTAL			

- The player then needs to work out their score for that quarter. For example 4 goals will need to be worked out by multiplying  $4 \times 6$ . **One goal is equal to six points.** DONT FORGET THAT.  $4 \times 6 = 24$ . You then need to add your points/behinds to that total.  $24 + 6 = 30$ . Your total score for that quarter is 30. Write that into your total column.
- The next player has their turn and repeats what player one has done.
- Play continues until you have completed four quarters.
- At the end of the fourth quarter, you need to work out your overall game score to see who's won the game. **Add up all of your goals and points and total scores.**

	Goals	Points/behinds	Total
1 <sup>st</sup> Quarter	4	6	30
2 <sup>nd</sup> Quarter	1	5	11
3 <sup>rd</sup> Quarter	5	2	32
4 <sup>th</sup> Quarter	3	4	22
FINAL TOTAL	13	17	95

- The winner is the person with the highest final total score.

P1 NAME			P2 NAME			
	PLAYER 1		PLAYER 2		TOTAL	
	GOALS	BEHIND	GOALS	BEHIND	P1	P2
1 <sup>st</sup> Quarter						
2 <sup>nd</sup> Quarter						
3 <sup>rd</sup> Quarter						
4 <sup>th</sup> Quarter						
<b>FINAL TOTAL</b>
