

GET OUT OF MY HOUSE

0	1	2	3	4	5	6	7	8	9
10	11	12	13	14	15	16	17	18	19
20	<p>How to Play: This game board, 2 dice and 7 counters (different colours) for each player.</p> <p>Take it in turns to roll the dice. They can use any of the four operations (add, subtract, multiply, divide) to find an answer from the two rolled dice. That player then places their counter on the board matching their answer. It is the first player to get all of their 7 counters on the board.</p> <p>If a player lands on a house with someone already in there they call out “Get out of my house” and return that counter to the other player and they place their counter in the house.</p> <p>Players can have more than one counter in a house. But if the other player lands on that house all counters are removed and returned to the other player!</p>
